Polychrome™ Polish

Polychrome™ is a brilliant smooth chrome like metallic finish in an unlimited range of colors with Gold #23 and Silver #10, Cherry Red #30, Royal Blue #38, and Emerald Green #40 as standard colors. Other colors are available. The standard thickness is 65-75 microns with thinner and thicker films available on special order. The standard width is 63 cm.

Polychrome™ Texturized

Polychrome™ Texturized is a high polished smooth with a second surface texture to produce a smooth surface and textured appearing film. Standard textures available are "Leaf" to produce a simulated Gold and Silver Leaf, a brushed metal finish, with a Fine stainless brush effect and an embossed brushed effect, which is a Coarse brushed effect. Large and Small Engine Turn patterns are also available. Standard colors are Silver #10, Gold #23. Other colors are available on special order. The standard thickness is 65-75 microns and the standard width is 63 cm.

Diamond Plate™ Standard

Diamond Plate Standard as produced by Griff Decorative Films is super bright and seamless. Standard colors are Silver #10, Gold #23, with other colors available on special order. The standard thickness is 65 - 75 microns, other thicknesses are available on special order. The standard width is 63 cm.

Diamond Plate™ Small

Diamond Plate Small is exactly the same design as our Standard - but a smaller version.

Carbon Fiber I & II

Carbon Fiber is a mainstay of the marine and auto body finishing business. Now you can achieve the look of this sophisticated industrial fabric with the cost effectiveness of PVC film. The subtle pattern of this gloss film is ideal for automotive aftermarket applications. Standard colors available are Silver #10 and Gun Metal #50. The standard thickness is 65 – 75 microns, and standard with is 63 cm.

Fantasy™ Particle Film

Produced with metalized polyester film glitter chips cut to .015" hexagon or .008" and embedded in the adhesive. All products available in Silver – Gold and Colors available special order.

Fantasy Films™

Fantasy Films, holographic effects, are all second surface textures and are available in a select range of patterns. Sequins, ¼" Mosaic, Crystal, Holographic Glitter and Rainbow. All are available in an unlimited range of colors with Silver #10, and Gold #23, as standard, other colors available. The standard thickness is 65-75 microns with thicker films available on special order. The standard width film is 63 cm.

Easy Color™

Easy Color™ is available in both transparent and opaque colors for use as an over laminating film. In the case of transparent colors, they will produce colors similar to our "body colored" films and when used over our metalized films you get a similar effect. When used over our Easy Color™ White film, you get sparkling clean and bright opaque colored effects.

Possible applications are displays and window trim as well as signs and decals. Easy Color™ can be cut similar to our regular products on computer controlled plotters. Easy Color™ is also suggested for back lit signs when applied over White Acrylic, PVC, or Polycarbonate.

Griff Decorative Films can also provide the following converting steps on all of its products.

1. All products can be laminated to board or other plastic films, please request pricing based on your requirements.
2. All products can be slit or sheeted to size, please request pricing based on your requirements.
